## Reproducible pain reduction results<sup>1-7</sup>

WOMAC pain subscale change from baseline across studies<sup>1-7</sup>

In all our studies<sup>1-7</sup>, Arthrosamid<sup>®</sup> exceeds the MCID of 9 points<sup>1,</sup> and improvement is maintained up to 3 years after single injection.<sup>5</sup>

† WOMAC or The Western Ontario and McMaster Universities Osteoarthritis Index is a measure of symptoms and physical disability LSMeans are modelled/estimated means. The estimated means are using data from the other visits and also the covariates. \*\*The minimum clinically important difference (MCID) represents the smallest improvement considered worthwhile by a patient
